About PIMCO

PIMCO is one of the world's premier fixed income investment managers. Since our founding in 1971 in Newport Beach, California, we have continued to bring innovation and expertise to our partnership with clients seeking the best investment solutions. Today our professionals work in 22 offices across the globe, united by a single purpose: creating opportunities for investors in every environment.

Index Overview

The PIMCO Tactical Balanced Index (the "Index") is a quantitative index designed to provide a stable risk profile by adjusting its allocation to stocks and bonds daily in order to target 4.5% annualized volatility. The Index also adjusts its bond exposure to potentially benefit from bond market trends, including rising interest rates. The Index may allocate to cash in rare instances during periods of extreme volatility.

The Index seeks to provide three key potential benefits

- **Tactical exposure** to U.S. equities, bonds and cash
- **Innovative features** providing long-term return potential
- **Design** developed by PIMCO's Quantitative Portfolios Group

Index Performance – Trailing 15 Years

The "PIMCO Tactical Balanced Index" (the "Index") is the property of Pacific Investment Management Company LLC ("PIMCO"), which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC ("SPDJI") for use of the S&P 500 Index as a component of the Index. The S&P 500 is a product of S&P Dow Jones Indices. S&P Dow Jones Indices, its affiliates and their third party licensors shall have no liability for any errors or omissions in the S&P 500 or the PIMCO Tactical Balanced Index. Standard & Poor's® and S&P® are registered trademarks of Standard & Poor's Financial Services LLC ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"); and these trademarks have been licensed for use by SPDJI. Any investment product based on the Index is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates, and none of such parties make any representation regarding the advisability of investing in such product(s). The Index will be calculated independently from PIMCO by an unaffiliated leading global index provider. It is not possible to invest directly in an unmanaged index.

Past performance is not a guarantee or a reliable indicator of future results. PIMCO Tactical Balanced Index performance contains back-tested performance beginning 22 April 2004, which is prior to the actual launch of the index: The PIMCO Tactical Balanced Index launched on 7 December 2015. Hypothetical and simulated examples have many inherent limitations and are generally prepared with the benefit of hindsight. There are frequently sharp differences between simulated results and the actual results. There are numerous factors related to the markets in general or the implementation of any specific investment strategy, which cannot be fully accounted for in the preparation of simulated results and all of which can adversely affect actual results. No guarantee is being made that the stated results will be achieved.

All investments contain risk and may lose value. Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. **Equities** may decline in value due to both real and perceived general market, economic and industry conditions. **Derivatives** may involve certain costs and risks, such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested.

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
